

Current Zeng

Quality Engineering • Test Automation • Web & Mobile Development

currentzeng.com | me@currentzeng.com

Senior QA Engineer with 7+ years of experience testing software, APIs, SaaS platforms, firmware, and connected hardware. Builds test automation and internal tools with Python and Playwright, and develops web and iOS applications with TypeScript, React, React Native, and Swift. Combines systematic debugging, practical product development, and cross-functional collaboration to improve reliability and deliver useful products.

Core Skills

Programming: Python, Java, TypeScript, JavaScript, SQL, Swift, Arduino C

Quality & Automation: Test Planning, Requirements Analysis, End-to-End Testing, Regression Testing, Playwright, Selenium, Sahi, Jenkins

Web & Mobile: React, Next.js, React Native, Expo, iOS, WidgetKit, Tailwind CSS

Systems & Integration: REST APIs, Backend Services, SaaS, Firmware, Embedded Hardware, SQLite

Tools & Workflows: Internal QA Tooling, Defect Isolation, Jira, AI-Assisted Test Design, Prompt Engineering

Professional Experience

Senior Software & Hardware QA Engineer (SDET) | June 2019 - Present

Vecima Network Inc. - Nero Global Tracking | Burnaby, BC

Lead day-to-day QA and automation for SaaS telematics and web products spanning user interfaces, REST APIs, backend services, firmware, and connected hardware. Translate requirements into test coverage, execute service-layer and end-to-end validation, maintain automation, and build tools that support hardware testing and remote diagnostics.

Selected Contributions

- Maintain and expand Playwright UI automation while migrating legacy Sahi coverage; review, debug, and validate AI-assisted code before it enters the test suite.
- Validate workflows across front-end, API, backend, firmware, and hardware layers, using logs and reproducible evidence to isolate failures and help engineering teams resolve regressions.
- Build internal tools for hardware validation and remote diagnostics, supporting repeatable testing and investigation of issues across software and connected devices.
- Convert feature requirements into structured JSON test cases for Jira through repeatable, prompt-guided workflows, then independently review the results for correctness and completeness.
- Use Atlassian MCP tooling to examine Jira requirements, surface missing scenarios and edge cases, and strengthen functional and regression coverage in collaboration with project stakeholders.

Professional Experience (Continued)

Jr. Electronic Engineer | May 2018 - Apr 2019

Neil Squire Society | Burnaby, BC

Designed, prototyped, and validated assistive hardware, including microcontroller-based devices, custom PCBs, and Arduino C firmware for proximity and sip-and-puff interfaces. Partnered with mechanical engineers to isolate integration issues and built a reusable component library that streamlined PCB development.

Software Projects

Bazi Atlas iOS App

Role: Full-Stack Mobile Developer

Stack: React Native, Expo, TypeScript, Swift, Supabase, RevenueCat, SQLite, MMKV, WidgetKit

- Built and self-tested a bilingual iOS app for Chinese astrology chart analysis, saved records, comparison, learning, and knowledge lookup; engineered and tested its TypeScript calculation engine.
- Validated service and platform integrations including Supabase backup, SQLite search, Sign in with Apple, RevenueCat purchases, Swift/WidgetKit features, local MMKV storage, and deep links.

Reindeer Education Website & Visit Booking System

Role: Full-Stack Web Developer

Stack: Next.js, React, TypeScript, Tailwind CSS, Resend, Vitest, Vercel

- Built a responsive school website with program pages, faculty profiles, galleries, and visit booking, using reusable TypeScript components and content-driven routing.
- Implemented visit-request workflows with validation, spam protection, UUID idempotency, and Resend email integration.

Education

Bachelor of Applied Science in Engineering Science

Electronics Engineering Concentration • Co-operative Education

Simon Fraser University • Burnaby, BC • February 2018

Leadership & Community

Co-Founder & Director | FCMS | Vancouver, BC | 2021 - Present

Co-founded a non-profit supporting independent musicians through community events and artist-focused media. Directed six events for 100-700 attendees and a 12-video live-performance series, coordinating sponsors, volunteers, budgets, live sound, and audio/visual production.
