Senior Dev QA Engineer SDET

Automation, Systems & Product Quality

Senior QA Engineer with 7+ years in software, hardware, API, SaaS, and network-connected systems testing. Skilled in automation frameworks, test planning, Linux troubleshooting, internal QA tooling, and release quality across cloud and on-prem environments. Experienced with Playwright, Python, Java, SQL, Jenkins, Selenium, Sahi, Postman, and REST Assured.

CORE SKILLS

SDET & Automation

Playwright Selenium Sahi

Test Automation Frameworks

Regression Automation

QA Tooling Defect Investigation

Test Case Design Defect Investigation

Systems & Troubleshooting

Embedded Systems Testing

Hardware Test Automation

Remote Diagnostics Device Configuration

Cross-Layer Root-Cause Analysis

Firmware Validation

API, Data & Integration Testing

Rest APIs Postman Rest Assure

JSON Validation SQL SaaS Platform

Front-End and Back-End Integration Testing

Programming & Engineering Tools

Python TypeScript JavaScript Java

SQL React Next.js Jenkins Vitest

QA Leadership

Cross-Functional QA Developer Colloabs

QA Mentorship Tech Documentation

Workflow Standardization

PROFESSIONAL EXPERIENCE

Senior Software and Hardware QA Engineer SDET | June 2019 - Present

Vecima Network Inc. – Nero Global Tracking | Burnaby, BC

Experience Summary

- Led QA and automation efforts for SaaS-based telematics and web platforms, including front-end, API, and embedded systems testing. Migrated automation from Sahi to Playwright and developed web-based tools to automate hardware validation and remote diagnostics.

Key Achievements

- Migrated the primary UI automation framework from licensed Sahi tooling to Playwright, improving maintainability, standardizing execution workflows, and making automation more accessible to QA, Development, and Customer
- Developed web-based internal tools that automate hardware validation and enable remote diagnostics, reducing dependency on manual, locally performed testing.
- Validate front-end, API, backend, firmware, and hardware interactions, using logs, system behaviour, and reproducible test evidence to isolate defects across multiple technical layers.
- Configure, test, and troubleshoot software and hardware across Linux, embedded, cloud, and on-premises environments.

WORKING EXPERIENCE CONTINUED

Jr. Electronic Engineer | May 2018 – Apr 2019

Neil Squire Society | Burnaby, BC

Experience Summary

- Designed and developed assistive technology hardware, including microcontroller-based devices, custom PCBs, and Arduino C firmware for proximity-based and sip-and-puff interfaces. Collaborated with mechanical engineers to build functional, user-focused products and created an internal component library to streamline PCB design workflows.

PROFESSIONAL PROJECTS

Reindeer Education Website & Visit Booking System

Role: Full-Stack Web Developer

Stack: Next.js, React, TypeScript, Tailwind CSS, Resend, Vitest, Vercel

- Built a responsive school website with program pages, faculty profiles, galleries, and visit booking.
- Created reusable TypeScript/Tailwind components and content-driven routing for easy site updates.
- Implemented visit requests with validation, spam protection, UUID idempotency, and Resend emails.

BaZi Atlas iOS App

Role: Full-Stack Mobile Developer

Stack: React Native, Expo, TypeScript, Swift, Supabase, RevenueCat, SQLite, MMKV, WidgetKit

- Built a bilingual React Native/Expo iOS app for BaZi chart analysis, saved records, comparison, learning, and knowledge lookup.
- Engineered a TypeScript BaZi engine for true solar time, Four Pillars, Ten Gods, Wuxing, Shen Sha, and transit analysis.
- Integrated Supabase backup, Apple sign-in, RevenueCat purchases, SQLite city search, MMKV storage, deep links, and iOS widgets.

EDUCATION

Bachelor of Applied Science in Engineering Science

Electronics Engineering Concentration · Co-operative Education

Simon Fraser University · Burnaby, BC · February 2018

LEADERSHIP & VOLUNTEER

Co-Founder & Director | FCMS | Vancouver, BC | 2021 – Present

Co-founded FCMS, a non-profit supporting independent musicians through community-building, performance opportunities, and artist-focused programming. Directed 6 large-scale events with 100–700 attendees, managing planning, scheduling, sponsor relations, volunteer teams, budgets, technical production, and live sound under tight constraints. Recently led FCMS On Set, a 12-video live performance project documenting local artists.
